TWO CRASH COURSES THAT

Take two courses that cover a lot of ground in a hurry. Konami® brings NASCAR® endorsed, smash and crash stock car warfare to the NES™ and Game Boy.™ Winston Cup Champion Bill Elliott helped design the ultimate driving experience, complete with functional instrument gauges, authentic pit stops, 200 mph duels for pole position, spin-outs and a mind blowing first person perspective. You actually feel like you're in the roll cage of a real racer!

Slide into one of three asphalt eating stock cars—Ford Thunderbird, Chevy Lumina or Pontiac Grand Prix (or an Oldsmobile Cutlass for Game Boy). Adapt your beast by adjusting gear ratio, spoiler angle, tire stagger and transmission to the hairpin turns of Sears Point and Watkins Glen or the high banked ovals of Daytona and Talladega (or Atlanta for Game Boy). Then get ready to scrape sheet metal against Bill Elliott and 14 of the nation's nastiest NASCAR drivers, either in single races or the grueling Championship Season.

Then, when you become a gifted gear jammer, enter the Konami Bill Elliott's NASCAR Challenge™ Contest. Send in your best NES or Game Boy Championship Season score. We'll fly the eight hottest prospects, four for the NES and four for Game Boy, in on Midway Airlines®

EGM SPANS THE GLOBE!

One of our main goals here at EGM is to put out a magazine which contains the most current video game information in the country. Our foreign correspondents have been able to supply us with the very latest info from Japan, but the video game industry is changing. In the past, the majority of games came from Japan but now a larger percentage of software is being developed in England, France and Germany. Accordingly, we are now expanding our International coverage to include software from these countries.

Also, ever since we became the authoritative source for games in the U.S., other magazines from around the world have come to us asking for permission to reprint information from EGM in their magazine. That gave us an idea. Why not create a worldwide network of game magazines? Information would be traded between magazines and everybody would benefit! After several months of meetings between the best game magazines in the world, the World NetTM was formed. If you liked what we did in the past, wait till you see what we can do, now that we span the globe!

Another change that you may have noticed in EGM is the running of special insert publications. We have just set up a separate division here at Sendai called the Contract Publishing Group. This group will be solely responsible for the creation of the inserts which you will see here in EGM and in other publications. These inserts will highlight and describe specific products from different companies in the game industry. To avoid any confusion these inserts are advertisements, and they are paid for by the respective companies. However, they are more than just ads. Since they are prepared by people who know games, these inserts will be informative. They will show and describe all the products of the respective companies. A good example of this is the Atari Lynx insert. It shows you everything you ever wanted to know about the Lynx. It gives you an insight, with pictures, of all the new games coming out in the near future. It is something that you would want to pick up and read. And, from the letters we have received, it appears that you like these kind of ads. More are scheduled to run in the upcoming months. Check them out and drop us a note as to what you think.

SEGA CD-ROM UPDATE!

I think your mag is terrific! You always have the most up to date info on all the game systems. I own them all and my favorite is the Genesis.

I've noticed that on the bottom right of the system is a small compartment that says "Do not remove". Is this where the soon to come CD-ROM will attach to the system? Also I've seen several different versions of what this awesome CD-ROM may look like. You would really make my day if you would track down what this really looks like. How much will it cost? What games will be coming out for it? And show a lot of photos!

Jon Stickel Huntington Beach, CA

I'm totally addicted to your mag! How you constantly have the most current info is beyond me, but keep it up. I especially loved your Genesis CD-ROM coverage. About this I have a few questions. What is its release date? Price range? Also, what game will come with it?

John Mason Rhinelander, WI

I've got three burning questions I need to ask you about the Genesis CD-ROM! Can it play music CD's? Can it play Turbo CD's? What is the earliest I can buy it?

Jake Lennington Rush City, MN

(Ed. Ever since we broke the news of this super peripheral way back in

Electronic Gaming Monthly

issue 15 last year, questions have been pouring in by the hundreds each and every month. Information has been very hard to come by but on June 6th at Tokyo Toy Show, Sega officially unveiled this super peripheral to the public. Of course EGM was there and we came back with lots of photos, a complete set of specs and a long list of new CD-games! Don't miss our special EG Express in this

issue. Also look for an in depth article in the July/August issue of Mega Play!)

The Sega CD-ROM is coming to Japan this Fall!

NEO-GEO PRICE CUTS!

The Neo-Geo looks like a great machine! I would love to buy it but it is just too expensive. Do you know if they are going to reduce the price in the near future to make it more affordable to us normal players?

Anthony Stephens Talbott, TX

I heard rumors that SNK is having problems in Japan and that nobody is buying the system over there. There is talk about a big price cut in the system and software. Is this true?

William Taff Pittsburgh, PA

SNK is claiming that their NEO-GEO is a 24 bit system. How can this be? I thought that it uses a 68000 processor. So then it must be a 16 bit system. It also has a Z80 but isn't that their audio chip. Can you set the record straight.

Dwight Thorton Ankeny, IA

(Ed. While we can't confirm whether the NEO-GEO is having problems in Japan, I can say from my discussions about the system with store owners in Tokyo that it is not selling very fast. The software is extremely limited and more than one copy of the game is seldom seen in the stores. The price reductions you mentioned are true! As of July 1.1991 the system price has been reduced from \$425 to \$360. Game prices have been slashed by more than 50%! Nam 75 is about \$100 and the big memory games are about \$155! As to whether the U.S. will follow suit SNK would not com-

Calling the NEO-GEO a 24 bit system is misleading. Two processors can be added together only if they are working in parallel. The only instance (so far) is the new Sega CD-ROM as it has it's own (and faster) 68000 chip which will handle the scaling, rotation and other specialized functions.)

PANTHER IS DEAD!

First of all, I think your magazine is great. I really like how you always get the scoop on the other guys. You were the first to tell us about the Genesis, Super Famicom, Neo-Geo and Panther. Anything new to report on the latter? One mag ran the specs.

Brian Ausberry Newton, PA

(Ed. We are sad to report that the Panther is an extinct species. Atari has killed the project in favor of a new one code named Jaguar. Would you believe two big 68000 processors running in parallel!

Your second point has a bit of irony to it Brian. By the time others finally get around to publishing the specs, the system is already dead!)

WHAT DETERMINES **MAGAZINE SIZE?**

I've noticed that the sizes of all the magazines seem to go in cycles. Starting in September they all get larger, and get up to about 200 pages in December. Then they taper off when in summer they are barely 100 pages. What determines the magazine size, as if it were up to me, and a lot of my friends, we would like to see them at 200 pages all year round. Your mag seems to be getting thicker. Any reason?

Charles Boaden Austin, TX

(Ed. You bring up a good point Charles and it is one which we get a lot of mail on. Magazine size is primarily determined by the number of companies which will run ads in any particular issue. A reasonable ratio which we go by is 50-50. That is for each ad there will be at least one page of editorial. Most respectable magazines normally go by a ratio close to this. Those who run at ratios with a lot of pages and very few ads are walking on thin ice. As the holidays approach the companies have more games to sell and they advertise more. That is why you'll see thicker books around Christmas. During the summer many companies trim back their ad pages as they have fewer games to sell.

Here at EGM we have been doing OK. Our book has been running around 132 pages during the summer while others have dropped to 100 pages or less. A count of the advertisers in any particular issue is a fair indication as to how well that magazine is doing in the eyes of the game companies. Ads aren't cheap and these companies want to get the best value (circulation vs. cost) for their money. It all boils down to the most popular mags getting the most advertisers. We believe that as the holidays approach you will see EGM running multiple insert books, posters, etc. and easily exceeding 200 pages and possible even be the first book to go beyond 300! We can't wait!)

WHERE ARE ...??

In past issues you talked about games like Cal. 50, Galaxy Force, and Outrun. I've been saving money for these games but so far I haven't seen them in the stores. What happened?

Bob Kaczmarczyk Calumet City, IL

I've noticed that you have a habit of mentioning certain games in one issue of your magazine and then we never hear about them again. Why do you do that? What ever happened to Mercs, Vapor Trail and Dando?

> Tom Bradley Topeka, KS

(Ed. When we run info from other magazines in our WorldNef™ we are giving you everything that is available in the world! Companies many time will release a few pictures of a future game to make a general announcement that they are working on that title. Months may pass before anything else is announced and while it seems like an eternity, especially if you are seriously interested in a particular title, eventually the company follows up on that game. Such was the case with Cal. 50, Galaxy Force, Out Run, Mercs, Vapor Trail and Dando. We caught wind of them some time ago while in Japan and just now are we seeing anything solid about these games. The fact is our sources are reliable and it is just a matter of time before they appear in the U.S. Check our CES report and Tokyo Toy Show article for the latest on all of the games mentioned.)

CES ATTENDANCE??

You keep talking about the Consumer Electronics Shows. I would like to go to one as it would be great to see all of the new games. How can I go about getting in?

Frank Klupp San Francisco, CA

(Ed. Sorry Frank, these shows are limited to the people whose work is directly related to the industry.)

DUPLICATE INSERTS??

I've got several complaints. First, I saw your Lynx insert in another magazine. Was it an ad or why did this happen?

Second, I hope you guys are happy. I called Sega and the Phantasy Star 3 book is as you stated - separate and not included with the game. Now I will have to pay \$70 for the game and then another \$20 for the book.

Erik Sclimek St. Paul, MN

Is it true that Sega will charge \$20 for the Phantasy Star hint book? What will happen with Shining and the Darkness? Will that book cost \$20 also?

(Ed. Well guys, while we voiced our opinions about packaging a hint book with the game, it is very doubtful that Sega buckled under our editorial. For a hint book to cost \$20 it has to be huge! Odds are that because of it's size Sega couldn't fit it in the game packaging (which is of a standard size). Even then, had Sega really wanted to be generous. they could have put a coupon in with the game where you could get the book free or at reduced cost. Nothing has been determined about Shining in the Darkness yet.

The Atari Lynx insert which we ran in issue 21 was a product of our Contract Publishing Division, As was the Turbo, RoboCop and Electronic Arts inserts. What the respective companies do with the insert is up to them. We were very pleased though, to see the Atari insert running in all of the reputable game magazines. After all, as stated in previous editorials, it is the goal of our 'interaction policy' to work with and for the game industry. Only by working together can everybody (manufacturers, retailers, publishers and consumers) benefit from such an association.)

SUSH

The main dude in charge has just returned from a special screening of Terminator 2! Don't worry, he's back to work - look for a new Super NES mag soon!

Ed's back from Tokyo Toy Show with a suitcase full of new carts. His favorite is Super R-Type by Irem.All we hear him say is how great the Mega CD-ROM was.

Martin is really getting involved with the Super NES. It's all he plays and it's hard to get him to put the controller down. It's a battle between him and Ed for Super R-Type.

Sushi-X made an appearance at the Tokyo Toy Show to help us get around in Japan. After the show he took us to his favorite arcades where he is now.

Super Nintendo - Nintendo Super Mario Bros. 4 Type:Action Release:Sept Levels: 96 Difficulty:Ave

King Koopa's back! This time he's kidnapped the princess and hidden her away in his underground fortress! Travel through 96 areas of action to reach her, fighting Koopa soldiers and Goombas all along the way. King Koopa's Family is helping him, however, so Mario and Luigi have their hands full! Luckily, they are not alone in their quest. Four different Koopa-eating Dinos are ready to help. Go Mario!!

While Super Mario World may not be the ideal cart to show off all the fancy things that the Super NES can do, it is a solid continuation of the Mario series. Even more segrets, hidden games, special moves and great game play can be found, with the addition of 16-Bit looks. A winner!

Easily the best Mario adventure yet but I had hoped that Nictendo would do more with the game than just make another Mario adventure. This should show eff the system's capabilities but there just aren't enough special effects when compared to other S-NES games.

Super Mario 4 is the biggest and most fun to play game, ever! Each level has sortiething totally new! You would think after 3 sequels that the big 'N' would suffer from idea burnout. Almost perfect, but then again no game is perfect. I'll take 96 levels of Mario over 20 of Sonic any day!

Here you have it! The ultimate Mario adventure! Super Mario World is a perfect subtitle, with 96 areas to explore! Everything just plain blew me away! Only one game in this genre rates higher in my book, but since tens are impossible, Sonic will have to share the same rating.

Super Nintendo - Konami Gradius III

Type:Shoot Release: Sept Levels: 11 Difficulty:Ave

The Vic Viper is on the call once more! Another hot sequel created just for the Super Nintendo, Gradius 3 offers larger end bosses, longer levels, and more objects on screen at once! The Vic Viper itself is now equipped with even more types of weapons and power ups, like the ultra-powerful Megacrush!! Pound through 11 diehard levels to reach the final confrontation with the alien boss!

Gradius 3 uses the 16-Bit power of the Super NES by increasing the detail of the landscapes and enemies (especially the Besses which fill the screen), hype the stere sound and incorporate some conventional play that is pocketed with flicker. This detracts, but the game remains good.

One of the better shooters for the new system. Though it slows down when the action gets intense the game does get better in the last two rounds. Great music when piped through a stereo Definitely one of the games to buy when you get the system.

My favorite series of shooters has finally gone 16 Bit. The graphics are truly an upgrade to the NES versions and the music is very cool. Tons of cool new weapons to use. The game lacks intensity and spems only to pick up in the later rounds. A very good shooter, but not the best.

Definitely, Gradius III is one of the best shooters to hit the shelves, and I recommend it to shooter fans, but I am sorely disappointed by the slow-down and flicker! Otherwise, the music is excellent and the graphics are great. Unfortunately, I always found myself reaching for Gaiares...

Super Nintendo - Nintendo F Zero

Type: Race Release: Sept Levels: 7 Difficulty:Ave

Ready for a race through time? Take a trip to the future of racing and play F Zero, the first racing cartridge for the Super Nintendo! Utilizing the awesome Mode 7 graphics. F Zero promises and delivers a driving experience not to be missed! Pick from four different hovercrafts, each featuring special abilities, ranging from speed, control, and acceleration! F Zero is the future of racing!

This is a really cool use of the scrolling and scaling that the Super NES can do in Mode 7. The content here is top-class, put to good use in addition to making the game look great. Good play mechanics and a fair level of options make F-Zero an immediate must-have for racing fans!

Fantastic! While I prefer a 'true' racing game, this futuristic version has some very cool features. The perspective used really gives the player a sense of speed and the scrolling is superb. Like a real racing game, technique is all important for the best times.

This game is awesome!!!

I've never enjoyed a driving game as much as I've enjoyed this cart. Great graphics make you feel like you're going 500 MPH! Incredible play control and realistic driving conditions make this one of the most addicting Super NES cart yet.

This is not just another racing game! The hair-pin turns and flying jumps are enough to make my head spin!
Rounding orners was never so smooth! Mode 7 really makes a huge difference in the playability and visual excitement this game has to offer. A must for racing fans!!

Super Nintendo - Capcom **Final Fight**

Type: Action Release:Sept Levels: 6 Difficulty:Ave

Haggar and Cody are two street wise heroes battling the Mad Gear gang to save Jessica, Haggar's daughter and Cody's true love. Choose from either hero and utilize their specialized attack methods to wipe out the Mad Gear gang! You may be outnumbered, but you have the courage and skill to beat them all! Your mission will take you through the This fight is a fight to the death - the Final Fight!!

Final Fight looks and feels like the arcade version on which it's based, but without the two-player cooperative it just loses something in the translation. The game play is too easy, but if you're in for a good fight with great graphies, Final Fight should fit the bill!

I just can't believe that with this super system Final Fight couldn't have been a two player game. If Sega can do it, Capcom could have also unless the game was 'rushed' just to get it out when the Super Fami was intro-duced. While it plays great it could have been better.

This is a good translation of the arcade hit. While most fighting games bore me, this one is pretty good. The graphics are some of the best ever seen on a home system and the sound is good too. A bit too short and easy, but good otherwise. Where's Guy? Where's Player 2?

I'm disappointed! When I first turned Final Fight on, I thought, cool, it's the best!! Then I found out that Guy, My favorite character in the arcade, was missing! The final nail in the casket was the lack of two player simultaneous play. Bad move!! Otherwise, game play and graphics are excel-

Genesis - Sega Streets of Rage

Crime has overpowered the city. and the only hope is the team of heroes, Adam, Axel, and Blaze. These ex-cops are highly trained in boxing, martial arts, and judo, and they are out to rip the crime lord's control apart! Fight through 8 blazing levels of action, sometimes featuring 12 enemies on-screen at once!! Two-player simultaneous action is here! Combined, they have 40 attack moves and infinite fun!!

Now here's a real version of Double Dragon for the Genesis. Streets of Rage blows away all other home fighting games with superb graphics, terrific interaction and more forms of attack than you can imagine! A winner in a category that has been sorely lacking on the Sega 16-Bit!

This is the way a fighting game can be made when the programmers know the system. Easily the best fighting garne ever with moves that are unique. The two player version sold me on the cart and with games like this Genesis does what Ninten..

Fighting games are not my cup of tea, but this cart totally blew me away from beginning to end. The game play is so good it puts all other fighting games, including Final Fight, to shame. Tons of moves and the best thing about it is the two-player mode. Funkadelic music, dude!

Final Fight, move over!! This is the type of fighting game I've been waiting for since Fighting Street! Two players, 40 attacks, 8 levels, large bosses, and music that rivals Sonic the Hedgelrog, Street of Rage is the best fighting game around! Let's see how Street Fighter 2 turns out...

Genesis - Sega Fantasia

Type: Action Release: Now Levels: 15 Difficulty:Ave

The Master's musical notes have been stolen and scattered throughout the Dreamworld! Take Mickey, the Master's apprentice, on a journey through multiple levels filled with numerous enemies, searching for the missing musical notes! Find the floating magic books to learn spells and wipe out the evil forces. If your magic power is too low, simply stomp on them with Mickey's familiar jump attack!

Fantasia does boast some of the best graphics and animation in a video game but the game play of this cart is too clunky and unpredictable to be much fun. The theme is pretty one-dimension too, so don't get into this game expecting a lot of depth. Nice for the younger set.

The music is fantastic, just like the old animated classic. The graphics likewise, are exceptional with great animations and backgrounds. However, to matter how great the game looks and sounds it has to play well. Control is difficult and detracts from an otherwise excellent soft.

The graphics are great but the game play is nothing like Castle of Illusion. The music is OK, I like the classical tunes. The animation is very spectacular, but the game play leaves so much to be desired. Too straightforward and tends to get repetitive easily.

Mickey's at it again, and the graphics are incredible! The instruments involved in the soundtrack are excellent, but the music is uritating sometimes. My main gripe is the control and game play. They're horrible! I loved Castle of Illusion, but Fantasia doesn't quite measure up.

Genesis - Sega Alien Storm

Type: Action Release:Now Levels: 8 Difficulty:Mod

Prepare yourself for the most horrendous invasion of aliens to ever terrorize the Earth. They're tearing apart our cities, mutating our people, and just plain unwelcome. It's time for a little planet cleaning, three of the toughest warriors in the galaxy are here to do it! Alien Storm features two-player simultaneous action that is extremely similar to Golden Axe. Pick from three characters, each with their own attacks.

I liked the all-out frenzy that Alien Storm inspires, and the game takes on new fun when played with a friend. The only thing disappointing about this little was the lack of real challenge needed to overcome most of the obstacle. Too short when all you do is shoot, shoot, shoot, shoot

It's good to see that Sega is beginning to make more two player games. This one is fun with two players but it unfortunately it is too easy that way. It's about right playing alone. Good graphics and control. Animations are well done and humorous at times.

It is not too hard to see glimpses of Golden Axe in this game, but there is enough originality to keep it separate. The graphics are cool and watching the animations of certain aliens is enterganing. The game is average in difficulty, but veteran gamers will walk right through it

Obviously based on Golden Axe, Alien Storm has ineredible graphics, game play exactly, and I mean exactly, like Golden Axe, and cool music sound tracks. If Golden Axe is your cup of tea then Alien Storm is right up your alley! Be warned, though, it IS Golden Axe in the future's clothes.

Genesis - Ballistic Hardball

Type: Sport Release: Now Levels: NA Difficulty:Easy

That's right baseball fans! It's that time of year again, and Ballistic's Hardball is here for the Genesis! All of the National and American League teams are featured in Hardball. As a pitcher choose from a variety pitches and stances, or attempt to pick off a base runner. As a batter, pick your stance and go for extra bases. Hardball's unique feature is the Batting Cage mode, allowing you to practice!

Its been awhile since Tommy was introduced, so Ballistic hits us with Hardball. Converted from the computer, Hardball plays a decent game but there aren't a lot of bells and whistles that feally jazzed me. It does have its merits, however, and should please most sports fans.

Easily one of the best playing baseball games around. Great graphics and the pitcher-batter screen is exceptional. Lots of pitches to choose from and a wide variety of subtle moves and options are built in. It will take some time to really learn how the game plays.

I don't like the reversed perspective of the batter and pitcher. It totally makes batting a frustrating event. The graphics are very good and the sound is great, real voices call out the plays. Not a whole fot of options here, but a solid-game of baseball. I like the batting cages.

Undoubtedly one of the most graphic baseball simulations around Hardball offers tons of variety and little to waste! The digitized are well done, and the graphics are excellent. The background music could use a little work, but that can be turned off. Not bad for a sports game.

IT'S TIME TO LEARN A THING OR TWO ABOUT FUN.

Professional gamer David Izat knows a lot about fun and

Nintendo - Capcom Little Mermaid

Type: Action Release: Now Levels: 6 Difficulty:Mod

Now you can take on the evil Ursula right in your own homel Help Ariel defeat Ursula and her vile vermin followers. Ursula has placed a spell on the sea creatures and only Ariel can save them! Perhaps if she can end Ursula's threat forever, she may yet find true happiness with her true love, Prince Eric. Use Ariel's Bubble power to enclose enemies and knock them out of commission. Watch out for the bosses!

I've got to review this game with the right attitude, because after all, it is for little girls

Beyond the fact that the action is really toned down, there aren't a lot of bad things to say about Mermaid, other than it does get somewhat being after awhile. Little girls should love it. I don't.

I have to give Capcom credit for going after a niche market. For that purpose, they have succeeded as it is a decent game. Serious players don't have to be warned about game as the title says if all. For the younger player this is a must have as it is a great nonviolent game.

A NES cart based on a romantic cartoon? Weird theme, but Capcom continues to deliver a solid game no matter what the theme. Decent graphics and sounds. Game play that is easy to grasp for younger players. A good game that is a little too easy because of its target player.

Ahhh...Finally, a true family game kids and adults of all ages and sex can enjoy! Little Mermaid has a near perfect blend of action and adventure. The music is upbeat, the graphics are good clean fun, and the theme is, of course, excellent. A must for young NES owners.

Nintendo - Arcadia Robin Hood

Type: Action Release:Now Levels: NA Difficulty:Ave

With an arrow, history was made. Based on the movie starring Kevin Kostner as Robin Hood, Robin Hood: Prince of Thieves is a very interactive adventure game for the Nintendo Entertainment System. The outlying story is the same. You are trapped in a Turkish prison, but you escape, only to find out that the SHeriff of Nottingham has taken control of the countryside in King Richard's absence.

I saw the movie and the best thing in it was the king and he only occupied thirty seconds of ilim. This game left me with an aqually unsatisfied feeling, not because there was anything wrong with what I was supposed to be doing, after awhite I just realized it wasn't much fun.

Not much of an action game but it isn't supposed to be. As a quest game it will make you think and more games should be made this way. Graphics are OK but not exceptional. The quest is about the right length and rather straightforward. No real touch spots to stump the player.

The game is pretty cool in that it tries to take a variety of game play concepts and blend them with the Robin Hood theme Its more of an RPG than an action game. The fighting scenes are very slow and have lots of flicker. I didn't-see the movie, but as a game Robin Hood isn't great.

Cool! If you liked the movie, you'll love this adventure! Taken directly from the movie template. Robin Hood makes a you feel like you are actually playing the movie by following the action scene by scene! In others words, it's a tremendous translation to the home entertainment screen.

Turbografx 16 - NEC Bonk II

Type: Action Release: Now Levels: 7 Difficulty: Ave

Bonk is such a butthead! At least that's what he turns into in Bonk 2: Bonk's Revenge! All new levels and meaner enemies await in this 4 Meg TurboGrafx-16 multiscrolling action extravaganza! New, innovative powerups are here, too, as well as some nasty looking round bosses!! The enemies aren't going to sit around while you bonk them, either. They have a whole arsenal of Anti-Bonk weaponry to rely on!

In Bonk's new adventure he can perform a variety of moves, but the general goals remain the same. Traverse the lartiscapes, kill the bosses and get powered up with meat! The controls aren't quite as responsive due to how Benk-moves, but number 2 is really more of the same.

As a sequel Bonk is more of the first game. I loved the original and also this version. Better graphics and sounds also help accomtuate the overall appeal. Bonk is just one of those characters who grows on you and with his cute animations this should be a hit for Turbo players.

Bonk 2 is a good attempt to improve on the original. The graphics have been improved, the sounds have also been enhanced, but the major flaw in this card is the game play has taken a step down. It just doesn't control as welf. If you liked Bonk you might be disappointed.

Bonk at his best! Take one look at the improved graphics, and you'll love it! The immous 'Bonk-spin' isn't as smooth, but the levels are incredible! This astounding achievement follows up the original with class and dignity, sporting cool tunes and smooth game play.

Gameboy - Capcom Megaman

Type: Action Release: Now Levels: 5 Difficulty:Ave

Megaman fans rejoicel Megaman is now portable! Enjoy 5 tough levels with Capcom's favorite video hero, Megaman, as he takes on robot round bosses and utilizes their powers against his other enemies! In the tradition of the NES Megaman series, Gameboy Megaman features high powered excitement and round bosses from the original Megaman, leeman, Bubbleman, Heatman, and Breakman.

This is the one type of game that will actually get me to pick up a GameBoy and play for hours on end. Sure, Mega Man is just like the NES version, but we get a whole new slew of challenges in a format that is portable! The graphics, sound and action of Mega Man are all top notch!

It seems that Capcom really knows how to satisf the Mega Man lovers. The GameBoy version is spectacular. The graphics are exceptional and virtually nothing has been sacrificed by going to the small screen. The quest is long, by GameBoy standards, and best of all it is fun to play!

OK, you've actually caught me playing the GameBoy for prolonged periods of time. Honest, it's all because of this cart. This is definitely my favorite GB and Great graphics and sounds and the classic game play that has lost nothing in the translation. Mega Man is mega awesome!

Awesome! Truly awesome! I never thought Capcom could really pull it off, but they far exceeded my expectations!! The music is righteous, and the graphics are excellent. The big surprise was the down-right stupendous control of Megaman, as few Gameboy games have this.

Gameboy - Jaleco Fortified Zone

Type: Action Release:Now Levels: 5 Difficulty:Mod

Alien forces have created several fortified installations on Earth. You and your partner have been chosen to infiltrate the fortresses and destroy the alien armada from within. Wach level is basically a maze of traps, enemy ambushes, and items. Find the key on each level so you can take on the boss of the level. Fortified zone also features multiple power ups, weapons, and a password option to save your game.

Fortified Zone has above-average graphics and sound to support what is really a very average game on the surface. As the action progresses, however, Fortified Zone offers a decent blend of goals that make for a satisfying offer. Good game play that puts some action in the strategy!

This cart is going to be a sleeper. Not a big name behind it but the game plays better than the average action game because there is more to it. No major faults either as it controls decent and the graphics are above average. If you want something different, get this cart!

This is a pretty cool cart for GameBoy. The graphics are very good and the sound is cool too. The game play is solid and there is a lot of strategy involved. I sort of got the feeling that it was more like a maze game though. Yet another good cart for the GB.

Now this is sure to be a sleeper hit if I ever played one. Fortified Zone takes Metal Gear and makes it fun! No level is to large or too small, no enemy to strong or weak. It was truly a fun Garneboy game How about that? I never thought I'd play two cool Gameboy games in one issue!

Lynx - Atari Pacland

Type: Action Release: Now Levels: 17+ Difficulty:Ave

Taken from the cutsy arcade coinop, Pacland looks right at home on the Atari Lynx. Pacman never looked better, and the ghosts come in all shapes and sizes! Follow the Pac-dude through over 17 areas in your quest for control over Pacdom. The Ghosts are the main enemies, roaming Pacland with no opposition; not until you came along though. Defeat the ghosts in a traditional manner: gobble them!

Pac-Land for the Lynx has some of the best direct graphics translations I've seen for a portable. The game is your basic Super Mano scrolling adventure that's simple enough to be enjoyable by beginners, while possessing enough hidden features to keep pros coming back.

Pac Land is one of those games that isn't spectacular but not bad either. It is mindless fur where you don't have to think or concentrate on what you're doing. It's a good version for a portable system with decent graphics and control. It kind of grows on you after a while.

Pac Land is an average cart with a couple cool features. The graphics are very colorful, and the sound is very annoying, but what else is new on Lynx. The game play is kind of sluggish, but once you get used to it you can enjoy the game. I think PacMania on Lynx would be cooler.

Not bad, but not great either. Come guys, let's see some more games like Ninja Gaiden of Gates of Zendocorl It's a good translation of a not-so-popular arcade game, so don't expert much. Average graphics, game play, and music. Not much more, not much less.

PREPARE TO BUTT Heads. Again.

The ultimate headbanger's back. Bigger, badder, and bolder than ever. And this time Bonk's got a score to settle. The evil King Drool III has

If the giant tortoise boss turns his back on you, watch out. He's ready to fire volcanic rocks.

retaken control of the kingdom with lightning fast speed. And it's up to Bonk to swim, fly, and battle deadly piranhas to avenge this travesty. Brace yourself for serious cranial impact: The headbanging cave dude has returned.

If your new game had 7 levels, and more than 7 secret bonus games, you'd be walking on air, too.

Those pesky creatures are back. And this time they're riding mutants. Giddyup.

READ ALL ABOUT IT!

World War VI left the Earth desolate and uninhabitable. Many years later, the Intergalactic Council discovered the Earth could once again be populated, and people returned to rebuild their lives.

Unknown to them, mutant forces had gone undetected, and are now wreaking havoc on the defenseless humans. Fearing the total extermination of the Earth, the Intergalactic Council has deployed AEROSTAR™, the most powerful fighter ever built. This state-of-the-art vehicle of destruction is Earth's only hope for salvation, but is useless without the right pilot

GAMING GOSSI

...New 64-Bit System Announced From Atari...New CD-ROM Technologies...Sony Play Station To Debut in '92... Super NES Release Date Announced...Nintendo Moves To Philips...Video Game Comics To Come...

...I've torn through the wastelands of the Consumer Electronics Show and surfaced intact! Yours truly has managed to dig deep this month, kiddies, for the ultimate in gaming gossip! So let go of your sticks you Quartermaniacs and let's blow through this month's wet and wild rundown...Quarterman is getting close to losing his marbles on this one Q-fans! I worked my way behind enemy lines to pull out the first news on Atari's 16-Bit to 32-Bit Panther project, only to have the machine explode in my face when Atari nixed the program in favor of a more top-secret system! Not to fear, however, for Quartermann is here to paint you with the true picture of where things stand inside the offices of the broken 'A'. First, the Q-Mann has learned that the white shirts of Atari have scrapped the feline that was rumored to be on a par with the Super NES, in favor of a more explosive unit that will, according to the company, take us all on a bold new frontier of video gaming! Quartermann will believe it when he sees it - but in the meantime. I've put on rubber gloves to reach in even deeper into the pit of Atari to pull out some more concrete info on what this is all about. Seems our Pong pals have tied the knot with an outside developer to create a the new technology that will be driving their self-proclaimed 64-Bit system! That's right you gossip hounds, Atari is tooting their horn 64 times! Even though there are currently no such configurations being mass-produced, that doesn't stop the Tramielian one from giving his new hardware a new name - the Jaguar...In a related story, Quartermann has tracked down leads that have led me across the globe in search of the mysterious "others" that may be working on latest cat in Atari's cradle. Rumors now indicate that the hardware may be based off of new technology being employed by Psygnosis! Representatives at the company would not confirm the story directly, but it does appear that something is brewing between our European friends...Of course you'll conform, you morons! You've never had the opportunity to do something creative enough to sell product...

...There were CDs a plenty at the recent CES in Chicago, with both NEC and Sega unveiling, albeit behind closed doors, the latest that the technology could muster up. I don't know about you, but I think it's kind of a dead issue until the bean counters can get the machines in our hands for a lot fewer beans. Anyway, Quartermann scored a direct hit with a behind-the-scenes preview of what these new machines will do and they are incredible! The NEC unit, which is self-contained, will use a technology called NID to compress video onto discs for instant access. Whoopie! Secondly, Sega's big guns will pack another 16-Bit processor in both barrels to give us scaling, rotation and other super keep features. No games are final for either technology, but the prospects do look nice...

... Nintendo made their own story at the CES by giving Sony a cold, icy one when the head honchos of Marioland decided to use the force and choose the "other" side: Philips! While Quartermann will refrain from calling them the big 'P', Philips is the force behind CD (after all, they invented the thing), and their aim is to standardize the marketplace. Magnovox had a machine working at CES, and the rumor has it that Nintendo wanted to attend the same partv...Sony, meanwhile, has brushed aside Nintendo's response and elected to go it their own. While Nintendo savs they won't support it, Sony will nevertheless bring out their own CD-I system based around the Super NES called the Play Station. Yes, Q-fans, another game system is on the way...

... As far as "official" dates are concerned, Nintendo has committed to a September 1 launch for their 16-Bitter! With Super Mario World riding inside, the new machine will clock in at \$199, with game softs expected at just under fifty bucks...Get set for a slew of comic books based on your favorite video game characters! Quartermann has already seen Double Dragon, but rumor has it that there will be a variety of new titles each boasting the mug of a different video game super hero. After seeing what Mario could muster in his comic adventures, the Q-Mann gives this idea a big thumbs down...Hit the lights, the Q-Mann is on his way to Terminator 2 with the head ed. Harris. Looks to be a blast, although Arnold fighting Jell-O could get interesting! That's it for now!

SEGA OF JAPAN UNVEILS MEGA-CD AT **TOKYO TOY SHOW!**

On June 6th, the first day of the Tokyo Toy Show, Sega of Japan formally introduced their long awaited CD-ROM peripheral for the Mega Drive. Called the Mega-CD, the unit is scheduled to be coming out in Japan this fall and in the U.S. in the spring of 1992. While a price was not announced. EGM has learned from sources in Japan that the Mega-CD

will sell for about \$370. Previous estimates had the Mega-CD selling for under \$250, however at that time, price was the major concern rather than performance. Since then Sega has shifted priorities, and with cost no longer a limiting factor. Sega set out to make a killer CD-ROM player. And that

The Mega-CD connects to the port on the side of the Mega Drive.

they did. They went the whole nine vards!

Not to make the same mistake that NEC did with their CD-ROM. Sega made sure that there was enough memory in the buffer to take care of any current game and any future product. NEC started with 64k then bumped that up to 2 megabit. Sega is starting with a whopping 6 megabits.

Another problem with the NEC unit is access time. One way to minimize this is to use a special (and costly) custom high speed laser pickup. New technology is available now and Sega has incorporated one of the fastest drive mechanisms around.

But the best feature of the new Mega-CD is the inclusion of a second, Mega Drive compatible, 68000 chip. Sega realized that the competition (S-NES) has scaling and rotation built into its hardware. Any type of similar 'tricks', as done in Sonic, have to be done with difficulty in the Mega Drive software. To correct this Sega built a faster (12.5 MHz. vs. 8 MHz in the Mega Drive) MC68000 chip into the CD-

ROM. Not only does it run over 50% faster but it also allows for biaxial rotation. scaling and zoom to be performed in the hardware. And, both processors can be running in parallel for ultrafast performance.

Besides great video effects the CD-ROM can now deliver audio equal to that found in their arcade machines. Besides offering true voice and CD quality

soundtracks there are 8 channels available for digital stereo PCM sounds. The Mega-CD will also play normal audio CD's, both the 3 and 5 inch sizes. Rumors have it that this unit will play the new CD+G discs but Sega would neither confirm or deny this. The CD-ROM, however, is not compatible with the new CD-I format.

The Mega CD will play all your favorite music CD's.

No matter how technically advanced a system is you need a good supply of games to play on it. Currently 27 companies are working on new software and much of it will be available early next year. The first three games to be released when the system comes out this fall are a Phantasy Star-type RPG; a Rastan-type action game and a guest game. Another half dozen games will be ready by Christmas.

NEW CD-ROM DRIVES ANNOUNCED BY NEC, SONY AND PHILLIPS

CD-ROM technology, originally pioneered by NEC, is the latest peripheral which all of the hardware manufacturers are planning to add to their game systems. Sega has their Mega-CD; Phillips/Nintendo has their CD-I player; Sony has their unit for the Super Famicom; and there even are faint whispers about a CD-ROM for the NEO-GEO. Clearly, this is the format that will be used for the games of the future.

NEC, the first to offer a CD-ROM drive is now the first to bring out several different formats, each for a different type of audience and price range.

The PC Engine is being complete-

ly redone. NEC has a new unit called the PC Engine Duo which is the PCE plus the new Super CD-ROM2 in one sleek 'wedge shaped' shell. Available also is a new foldopen monitor/TV similar in specs and concept to the ultra high performance screen found in the Turbo Express. The screen though is about 5" rather than the 2.6" on the

Also from NEC is a redesigned

CoreGrafx2 and a new 'clip-on' Super CD-ROM2 player. The 'clipon' player will also connect directly with the older CoreGrafx and Super-Grafx.

And to make everything work smoother, NEC has announced that the CD-ROM system card will be upgraded from 64 kbits to 2 Megabits. It will be called the 'Super System Card' Version 3.0. With the extra memory the CD-ROM will be able to have fewer interruptions for disc access allowing for better and smoother animated intermissions and longer game levels.

At the CES NEC demonstrated a new CD format called NID (New Interactive Display). This format, developed around international standards, provides a data compression rate of 100 to 1. With this compression rate literally hundreds of gigabits of information can now be stored on one CD. Memory intensive data such as film footage, photographs, graphics and stereo

An early prototype of NEC's NID CD-ROM

quality sound can be easily stored with room to spare. Since the data is all digital, full motion, picture in picture, multi-picture, slow motion, frame advance and windows are all possible. Up to an hour of broadcast quality video or 20,000 still photos could fit on one 5 inch CD.

The big news at CES was the announcement by Nintendo that it would not support the new CD-ROM

Sony's Play Station - A Super Famicom/CD-ROM system.

format being developed by Sony for the Super Famicom. Called Play Station, this was to be Nintendo's answer to the Sega and NEC CD-ROM units. Sony has stated that it will still do the project even without software support from Nintendo or its licensees.

Nintendo instead signed a deal with Phillips for a CD-I unit that would interface with its S-NES. The hardware is done, and work on the software has begun. Super Mario, Zelda, and Donkey Kong are some of the characters already licensed for CD-I software development. The unit should be available in the fourth quarter of 1992.

Phillip's CD-I player will be shrunk down and interfaced to a Super NES.

SUPER FAMICOM

With the Super-NES coming to America next month, most of the existing and in-development Super Famicom carts are quickly being converted to S-NES softs for the September hardware rollout. But Japan is where the majority of the games are being developed and there were a few new softs not yet on the U.S. schedule. Super Formation Soccer,

Dungeon Master, Super Tennis and Super Pro Wrestling were the best of

the new titles. Also, now that the SF is out in sufficient quantities, the third party joystick companies have started to work

on new and improved controllers.

Irem/Famicom KID NIKI 2

Irem is bringing out the seguel to the original Data East Kid Niki that we enjoyed a few years ago on the NES. The game play is much the same as are the weapons and the horizontal above and below ground scrolling action. The quest is all new though, with new enemies and boss characters.

Namco/PC Engine HORSE RACING

Feeling lucky? Got a hunch? Then get your money out and bet on the old nag that you're riding. Whether you win or lose is not just by chance as you can control how you uses your horse's energy. Break out of the pack early and you might not have the strength to stay ahead of the rest. Some strategy, some luck and some skill. Not a bad game overall.

Don't necessarily break out in the lead early as your horse might run out of steam in the home stretch!

Varie/Famicom F-1 Hero 2

There never were any really good auto racing games for the Famicom (NES) until now. Varie is bringing out a series of high res. auto racing simulations for all game formats. The Famicom version is exceptionally well done and offers the player a wide variety of setup options in adition to a long list of courses. Excellent graphics back up a well designed soft.

Set up the bike for the best performance on the course you're on.

Irem/Famicom CYCLE GRAND PRIX

Like the Varie auto racing game, Irem's motorcycle grand prix is very well designed. Set up the bike depending on expected track and weather conditions. The courses are those of the real GP circuit so there is some realism built in. With a split screen you can race head-to-head against a friend and each can watch his own screen

Sega/Mega Drive OUT RUN

One of the best auto racing games of all times is coming to the Mega Drive in 8 meg form. The choppiness and problems with the SMS version are gone and all that remains is the spectacular game as it should have been originally done.

PalSoft/ Mega Drive UNDEADLINE

The best Mega Drive shooter at the show comes from PalSoft. Very intense enemy action, great weapons and power-ups and spectacular graphics separate this from the rest. It's not a cakewalk either as technique plays an important part also.

FORCE II

CRI/Mega Drive GALAXY FORCE 2

Like Out Run, Galaxy Force 2 is a major improvement over the original SMS attempt. Good scaling, exceptional graphics and a deadline to beat make this a very difficult but challenging shooter. Worth looking for.

Telenet/PC Engine VALIS 4

Each time a new version of the Valis series comes out there are dramatic improvements over the previous cart. Valis 4 is no exception as the graphics and audio have been tweeked to near perfection. The quest is longer and harder but still enjoyable.

Hudson/ SuperGrafx 1941

As hard as it may be to believe that the super Genesis soft has now been converted to the GameBoy, the pix below don't lie. Actually it plays very good, is challenging, and would be a good title to see in the U.S.

Taito/GameBoy RASTAN

Another surprise is the conversion of Rastan for the GameBoy. Like Sagaia, Rastan plays unbelievably well considering the small screen and lack of color. The quest is long and the game play is challenging.

AN INTRODUCTION TO THE SUPER NES

The long wait for the Super Nintendo is almost over! Within one month the units should start appearing in the stores around the country. Hopefully the S-NES won't be a surprise to anybody as the staff here at Electronic Gaming Monthly has been actively covering the development of this spectacular system since issue number 2, back in June of 1989! The Super Famicom, its Japanese counterpart, has been wildly successful since it was released last November. Selling over 1.5 million units in less than 6 months the Super Famicom has taken Japan by storm. The main unit has undergone a variety of cosmetic changes for the U.S. marketplace. The most obvious change is the shape of the casing. A more futuristic looking design was used to make the Super NES look more like an advanced piece of equipment rather than a child's toy. The unit is accented with shades of purple. For example the buttons on the controller are no longer in 4 colors but in two shades of purple. The cartridges load into the top and the power and reset buttons are uniquely positioned in that you must push them forward rather than press down. The Super NES will officially be available in the United States in September 1991! The unit will be packaged with the blockbuster hit Super Mario World, 2 advanced controllers, a power source, and RF cables. Also available around the time of release will be approximately 18 game titles to choose from as well as a Super NES cleaning kit. The system will retail for \$199.95 and all cartridges manufactured by Nintendo will sell for \$49.95.

TIP CONTROLS

The controller for the Super NES is a work of art. Eight buttons and a control pad are present. The four main buttons A, B, X, and Y are shaded in purple. The X and Y buttons are concave so that you won't need to look at the controller to find the right button in the middle of a game. The Left and Right buttons at the top are useful for special options in many games.

The Super NES Buyer's Guide

THE SYSTEM

The Super NES has by far some of the most impressive specs of any piece of consumer video game hardware. Nintendo developed the main

processor, it is a custom chip called the 65816. The system runs at 3.58 MHz, while not incredibly fast the Super NES can handle a huge amount of graphic information at one time. There are a total of 32,768 colors available and 256 can be displayed at any one time. The maximum res-

olution is 512 x 448 with a maximum of 128 sprites on the screen at one time. The audio capabilities are just as impressive due to a custom

Sony sound chip with an 8-Bit CPU and a digital processor built-in. This allows musical tracks with up to 8 layers in full stereo and phenomenal digitized sound effects. By far the most impressive feature of the

Super NES is the graphics mode known as "MODE 7." This allows the Super NES to rotate and scale a

sprite without limit. The effect is clearly evident in Nintendo's hauntingly realistic flight simulator Pilotwings. Mode 7 is what makes the Super NES stand out.

Nintendo's Pilotwinas

The one thing that really counts on any game system is the software. What kind of game will the Super NES play? You can be sure that there are going to be plenty of good softs available when it hits the shelves. Nintendo has 63 third party licensees that are developing for the Super

NES. By the time the system is released there will be over 18 hot titles on the shelves. Most

of those titles are enhanced continuations of 8-Bit titles such as Gradius 3, Super Mario World, Zelda 3, and Castlevania 4. There is also a large selection of original titles too. Actraiser, for example, pushes the Super NES to the limit in graphics and sound. There are over 40 games previewed on the next few pages, check them out for yourself.

ACTRAISER

Here is a game that not only stretches the graphics of the Super Nintendo to the limit, but also the sound as well. In fact, the orchestrations in this game are so robust and realistic, you'll wonder if there's a microchip symphony playing inside the Super Nintendo! Actraiser, by Enix, provides the strategy and planning of Populous with the in-

tense hack and slash action of Rastan. Throw in some of the most amazing scrolling and scaling techniques and you get a cart that not only pushes the standards of game play to the max, but the visual abilities of the Super NES as well. A fantastic first effort for the Nintendo 16-Bit!

SUPER BASEBALL SIMULATOR

This is the follow-up to Culture Brain's hit NES game, Baseball Simulator 1.000. Super Baseball Simulator takes off with all of the basic elements of any good baseball game, then enhances them with loads of features and a variety of special pitches and batting techniques. You can throw fireball pitches or lightning pitches to

totally blow the batters away. The batters can use special techniques like the twister to confuse the players. As a regular baseball game, you could say that Super Baseball Simulator is above average, but the addition of the Ultra League makes this an extremely fun game to play.

BIG RUN

Based on the arcade hit from Jaleco, this translation of the coin-op driver features dazzling effects and pedal to the metal racing action. Big Run takes a different approach to the driving theme because it doesn't use any of the special graphics modes for its first person effects. The most impressive part of this title is the unique manner in

which jumps and other special maneuvers are depicted. There is even a night scene in which the only part of the road that you can see is illuminated by your headlights. While the graphics tend to be a little choppy, the game has a variety of features and is a new addition to the driving theme.

BOMBUZAL

Bombuzal is a unique puzzle game that requires strategy and planning in order to survive each level of challenge. Each level has a certain arrangement of bombs on a very volatile platform. One wrong move and you may be video vapor. To finish a level you must set the bombs off in the right order so that all

bombs are destroyed and you are still intact. The game can be played from either 3-D or 2-D perspective. Bombuzal is one of the first Super NES carts directed at a younger audience as well the first with a puzzle theme. Does not make good use of the Super NES hardware though.

DARIUS TWIN

Taito brings you the latest in Super NES shooting action. Darius Twin is a blend of all the great features of Darius and Darius 2 plus enhanced power-ups and even more intense game play. A multitude of weapons are at your disposal, and you'll need every one of them to get past the humongous end bosses that await you in each round. Great

parallax scrolling is used throughout the entire game. The graphics are extremely detailed and the bosses are definitely some of the most impressive ever seen on a home video game. The game play is challenging enough for all players and the 2-player mode is a welcome feature.

STEVE ED MARTIN SUSHIX

6 7 7 6

FINAL FIGHT

Final Fight from Capcom is of the most long awaited titles for the Super NES. Featuring all of the intense punch and kick action of the coin-op version, this cart has lost very little in the translation. The graphics are virtually identical, pixel for pixel and the sounds are first rate. Pick from either Cody or Haggar and go rescue

Jessica from the Mad Gear gang. You must battle your way through more than five different levels of action filled with street punks, wrestlers, and samurai swordsmen. Final Fight is a fighting extravaganza filled with loads of action and challenge from beginning to end.

STEVE

ED MARTIN SUSHI X

8 7

F-ZERO

Driving games have just entered a whole new dimension. F-Zero is the first driving game available for the Super NES and so far it is the most incredible driving game for any home system. The wizards at Nintendo have cooked up the most realistic driving contest ever. The use of Mode 7 is clearly what makes F-Zero the best. Each hovercraft has its own han-

dling characteristics and acceleration curve. Prepare to compete on seven futuristic courses for some really intense high speed action. Race against the clock and try to beat your best time or go against the competition. Totally addictive and totally awesome driving action.

GRADIUS 3

The legend returns. This sequel to the greatest series of shooting games for the NES begins right where the others left off. This time the battle is even more insane. You must pilot your lone starship into the heart of the Bacterion Empire and destroy the evil Motherbrain. The odds aren't that bad though, because you

have 25 different power-ups at your disposal. Gradius 3 is filled with shoot-em-up action from beginning to end. Huge end bosses that take up the entire screen await you at the end of each level. You must blast your way through 11 levels of pure action in order to save Gradius.

Hole In One Golf from HAL is the premier golf game for the Super NES. The game has a variety of features that make it one of the best golf simulations available. There is a huge selection of clubs and a full 18 holes to challenge the discriminating golf fan. Along with a great game of golf, Hole In One also takes advantage of the power of the Super NES hardware. Before you play a game you get a special overhead tour of the course ala Graphics Mode 7. In some of the more intense shots you'll even get a close up of the hole. All in all the graphics, music and game play make Hole In One a standard by which all other golf games will be judged.

STEVE ED MARTIN SUSHI X

PILOT WINGS

Pilot Wings from Nintendo will be one of the first titles available for the Super NES. This cart takes advantage of Mode 7 in almost every way. The scaling and rotation are so smooth in this game that those with a weak stomach may find themselves air sick. Basically this cart was made to show off what the Super NES can really do, but with it's unique theme and incredible realism this game will become an instant classic. The 4 main styles of flying you can try are flying a biplane, hang gliding, sky diving, and jet pack. Then if you qualify you can raid the enemy camp with a helicopter to win the game.

STEVE ED MARTIN SUSHIX

POPULOUS

The popular computer game hit from Electronic Arts is being brought to the Super NES by Acclaim. You are either the good god or the ultimate baddie, trying to help your population achieve victory over the other side. As your people prosper and multiply, their increased karma give the respective deities the ability to raise and lower lands, cause

earthquakes and floods, create volcanoes and, at the highest level of karma, a great cataclysm called Armageddon (not for the faint of heart). Through it all, your respective hero roams the land, attacking the enemy and burning down their houses. There are 500 worlds of fun to conquer!

STEVE

MARTIN SUSHI X

h

Super Deformer is a new action game for the Super NES. You can control one of three different robots, each with different strong and weak points. As you progress throughout the game you'll fight all types of enemies and huge end bosses. This game takes a different approach to the action theme because most of

the characters are very cute and cartoony. Battle your way through seven different worlds before making it to the lair of the main boss. While it isn't one of the most spectacular titles for the Super NES, it does have a high level of playability and a theme for younger players.

STEVE

MARTIN SUSHI X

ED

Sim City, the popular PC hit, is coming to the Super NES from Nintendo themselves. You must construct a city from almost nothing and maintain it over a period of time. Build police and fire departments, schools, and recreational facilities to keep the citizens happy. As your city progresses you'll have to zone different areas and keep an eve on the

industrial sections. Be sure the entire city has enough energy as we wouldn't want a power failure, would we? You must keep the transportation system running smoothly and watch out for disasters such as attacks from monsters. Sounds difficult, but it's really fun and addicting.

MARTIN SUSHI X STEVE ED

Fortunately you won't have to buy this great title. Nintendo is packaging it with the Super NES. This has got to be one of the greatest games of all time. After four sequels you think that they would of run out of ideas. Each level in this game has something new, a new character, a new power-up, or a new secret to figure out. That's pretty impressive if you consider that there are 96 levels in all! Fantastic graphics and hilarious animations accompanied by superb music and sound effects. It's a good thing that it's being packaged with the Super NES or you may have been waiting in line for this hot cart.

STEVE ED

MARTIN SUSHI X

This is the second golf game that will be available for the Super NES. T&E golf is a three dimensional golf simulation that has a variety of new features and enhancements. The course is drawn with extreme detail and there are many obstacles such as sand traps and water hazards to avoid. The game play is very complex and tends to be a little

slow moving. There isn't much of a musical score and the only background effect is the occasional chirp of a bird. The game lacks any outstanding features and doesn't utilize any of the advanced hardware features of the Super NES. For the die hard golf fan only.

STEVE ED

MARTIN SUSHI X

Ultraman is coming to the video game world. This is Bandai's first Super NES title and it looks like it'll be a sleeper hit. You must battle against eight different monsters who are terrorizing the land. You're not just a normal super hero though, you have the ability to increase your size to gigantic proportions. You can use a variety of special attack moves like roundkicks, uppercuts, and jumpkicks as well as defensive moves like back flips and somersaults. To finish off the monsters you must use a special laser technique. Great animation of the huge characters and great sound make this a pleasant cart.

STEVE ED

MARTIN SUSHIX

DIMENSION FORCE

Dimension Force is a new overhead shooter for the Super NES from Asmik.

The game takes advantage of the special graphics modes of the Super NES. Very intense helicopter shooting action.

DREAM TV

This original action title for the Super NES from Triffix features an involving

environment to explore and a variety of different game play options. Progress through caves, forests, and large dungeons.

HOME ALONE

Based on the hit movie, Home Alone from THQ lets you relive your favorite parts of the movie. Your parents have gone on vacation and left you home alone. You have to defend your house from thieves.

HYPER ZONE

HAL takes a different approach to the shooting theme with Hyper Zone. Hyper

Zone is very similar to F-Zero utilizing the special graphics modes to produce a very intense effect. Unique and interesting.

EGEND OF MYSTICAL NINJA

This totally original action cart from Konami has a lot of potential. It's filled

with great graphics and has solid game play from beginning to end. It also features 2-player simultaneous game play.

CASTLEVANIA

Konami brings you the fourth installment to the Castlevania series. This looks like it's the best one yet! Incredible graphics and sound enhance the classic Castlevania game play. New weapons too.

CAVEMAN NINJA

You are Joe and Mac, two of the coolest cavemen in your time. Caveman Ninja from Data East has some of the best graphics ever seen in a home video game. Huge dinosaurs literally fill the entire screen.

SUPER GHOULS 'N' GHOSTS

This is truly one of the most amazing games on the Super NES. Mind blowing graphics, sterling sound and game play with a high level of difficulty blew us away in every way.

Hudson is bring the third installment of the Adventure Island series to the Super NES. Fantastic animation and soundtrack combined with great game play make this a cart to watch for.

Sunsoft brings the action of the mega popular computer game to the Super NES. You must lead a

band of loval lemmings through a land of danger and keep them from killing themselves.

PAPERBOY 2

This sequel to the classic coin-op features an all new neighborhood to explore

and deliver papers to. Improved graphics and sounds plus a variety of new aspects to the game play make it even more fun.

The city is plaqued by crime. It's going to take more than an ordinary cop to clean

up the streets. Ocean is bringing Robocop to the Super NES and enhanced the familiar game play with 16-Bit graphics and sounds.

Super NES. Acclaim uses the superior graphics abilities of the Super NES to bring Bart and the rest of the Simpson family to life.

Incredible animation.

SMASH TV

Acclaim is bring the nonstop action of the arcade smash to the Super NES.

The game is a carbon copy of the coin-op, the graphics and sounds are virtually identical. Great futuristic fun for two players.

SPACE MEGA FORCE

Toho's first Super NES title is a great overhead shooter with tons of action and good game play. A multitude of weapons to choose

from and great multilayered graphics blended with very intense game play.

RADIO FLYER

Here's a very original game for the Super NES from the Ocean. While all

> we have are a few preliminary screen shots, the game may play somewhat like Pilot Wings. A very interesting and unique game.

If you want to challenge your mind rather than your reflexes, The Chessmaster

> from Software Toolworks. Game play takes place on a highly detailed three dimensional chess board. Hours of timeless strategy.

FACEBALL 2000

Based on the GameBoy title from Bullet Proof Software, FaceBall 2000 is sort of a modern day stress reliev-

er. You're a smiley face with a bad attitude and you must go around a maze and blast your rivals.

SHANGHAI

Mediagenic is bringing the classic puzzle game to the Super NES. You must

remove all the tiles by using strategy and cognitive thinking skills. New features let you change the tiles to your liking.

This is the ultimate shooter. Incredible 16-Bit graphics and sterling sound combined with strategic game play and an arsenal of awesome weapons. Irem puts the best of both R-Type 1 & 2 into one amazing cart!

Absolute Entertainment is bringing this tank simulation to the Super NES. The graphics are first rate and the game is very complex and realistic. A good simulation based on the war in the Gulf.

WANDERERS FROM Y'S

American Sammy is bringing this popular RPG to the Super NES. The graphics are a definite improvement over all other versions. The quest is still intact and the music is great too.

FORMULA 1

This spectacular new driving game from Seta takes advantage of the Super NES's special graphics modes to bring you the most realistic racing action ever seen. Great sounds also bring the game to life.

ULTRABOTS

tank warfare into a different dimension. Get into your high tech walking tank and blast your opponents. Great graphics and sound bring futuristic

DRAKKHEN

tank warfare to life.

Here's a new three dimensional role playing game from Kemco Seika. Based

on the popular computer title, this translation has great first person scrolling and better graphics. Hours of involving game play.

FINAL FANTASY 2

feature an expanded quest with hundreds of hours of game play and other enhancements like great graphics and superb sound.

AMERICAN GLADIATORS

Based on the popular TV show, this cart brings all of the action home on the

Super NES. Events include the Eliminator, Joust, the Assault, The Wall, Powerball, and the Human Cannonball

with a futuristic contest of agility and reflexes. Fast paced action takes basketball into a new dimension on the Super NES.

LAKERS VS. CELTICS

Electronic Arts is determined to capture the power of the Super NES to make the

most realistic sports titles ever. This translation of their great basketball game has improved animation and game play.

NOLAN RYAN BASEBALL

Romstar is releasing a baseball game filled with great game play and special

cinema displays to heat up the action. A variety of other options are thrown in to give you one of the best baseball games around.

PGA TOUR GOLF

Also on EA's line up is a revamped version of PGA Tour Golf. This enhanced

version features a cool new concept called Ball Cam in which you get the ball's perspective of the green after you make a hit.

SUPER NES PLAY ACTION FOOTBALL

Nintendo is bringing a 16-Bit version of their popular 4-player NES title to the Super NES. Improved graphics and game play as well as more plays make this one of the best football

WWF SUPERSTARS

games on the market.

World Wrestling Federation with 16-Bit graphics and sounds. Features popular wrestlers like Hulk Hogan, The Ultimate Warrior, Mr. Perfect, and many others.

JOHN MADDEN FOOTBALL

THE YEAR OF THE SEQUEL!!

The years 1989 and 1990 saw the rise of incredible popular GameBoy hits like Double Dragon, Teenage Mutant Ninja Turtles, Nemesis, and Robocop. Now, as we rush headlong into the nineties, sequels are beginning to flood the market. Sequel titles are popping up everywhere, and very few original hits are to be found. Double Dragon 2, TMNT 2, Nemesis 2, and Robocop 2 are just a few titles scheduled for a fall release, with more on the way.

Not only are GameBoy titles being rehashed, but even some smash NES games are being converted to the portable format, disguised as sequels. Metroid 2: The Return of Samus is a classic example. Even though the game claims to be a sequel, the overall game play and powerups are identical.

Some super-power hits are good enough to stand alone, like the upcoming Castlevania series for the GameBoy. Castlevania 2 proves to be worthy of it heritage!

Metroid II: The Return of Samus

Final Fantasy II and Double Dragon II

The game control, graphics, game play, and soundtracks are drastically improved over the previous title, showing that not all sequels are boring and unimaginative. Along the same lines, Double Dragon 2 is a true sequel, bearing all new moves, graphics, and soundtracks.

Of course, most of the entertaining titles on the way are either sequels or NES to GameBoy conversions. The Simpsons is one such conversion. The Simpsons for the NES is based on alien mutants trying to conquer Earth while The Simpsons for the GameBoy is based on the an evil Summer camp. The graphics and game play are alike, but the plots are completely different. Choplifter 2 is coming soon, but it sports game play, graphics, sounds, and levels almost identical to the original.

Some other titles to appear soon include: Battletoads, Bomberman, and Bo Jackson's 2 in 1. One noticeable trend in portable gaming is the conversion of popular movie titles to the on-the-move format.

Hudson Hawk, Home Alone, Rocketeer, Robocop (1 and 2), and The Terminator are all big buck films with big buck contracts for their title rights. So far, the entry into the video game field hasn't been very successful. Perhaps after seeing the downfall of previous titles on the NES. Genesis, and Turbografx, licensees may learn that big names don't necessarily make big games. Some titles have suffered due to a lack of planning and organization. A game based on a box office hit should reflect the time and effort of the film.

As of this date, licensees for the Lynx and Game Gear are not in a hurry to add movie titles to their list of portable fun. Nintendo has a virtual monopoly on these games, and they are feeling both the benefits and ramifications of "movie games." Thus far, Game Gear titles are strictly limited to Sega Master System games, while Atari continues to develop their own software, ranging from original concepts to a few coin-op translations like Ninja Gaiden and Pacland.

Also, neither of these two superior systems has cranked out sequels to their smash hit games. No word exists on a Chip's Challenge II or Blue Lightning II. Game Gear seems to be heading down a steady path of rehashed SMS games, but original titles aren't far behind. The Turbo Express faces a similar dilemma: no original titles. Well, the nineties are still young, and the future promises a large treat for us all.

THE ULTIMATE ADVENTURE AWAITS...

The ultimate adventure is about to begin on the Super Famicom. The highly anticipated Zelda 3 is finally here! Once again, you are a brave hero you must go about the vast land of Destroy evil creatures and collect Ruples to help you buy supplies and weapons. The obvious enhancements are the extremely colorful and detailed graphics. The new level of detail makes the quest seem even more realistic. Link must not only endure hordes of monsters, but he also has to deal with the forces of nature. Thunderstorms, caves, deserts, forests, you name it and Link will have to overcome it. The audio has also been refined, with rich background music for each area of the game. The quest is massive, four times larger than the previous two carts. There are a ton of new items to find as well. A truly remarkable game that will definitely be worth the wait.

Special Code for Mighty Warlock - If you would like to have an extremely strong character from the beginning of the game use the code COEAM MODAO. You will become a Warlock at the 17th level and should be able to fly right through the game now.

LAST ALERT

(NEC/TurboGrafx-16 CD-ROM)

Super Power Up Trick - There is a way to get a maximum level character very early in the game. First you must play through the game up to level 3. Once you are in the scene where the stealth fighter is taking off, start destroying as many jeeps and armored vehicles as you can. Keep doing this until your time runs out and then continue. With each experience level you gain, use the more powerful weapons to increase the number of points gained each time you continue.

Keep continuing and destroying jeeps to build up to maximum level.

Where monsters finally face the music!

You'd expect a great role playing game to have plenty of monsters and creatures for you to conquer. You'd expect the band of six hardy adventurers you create to have magical powers and weapons to wield in battle. But only The Bard's Tale brings you the unexpected—the awesome weapon of magical music! Though each of your team has unique skills, the Bard's songs have devastating effects on your fearsome foes. Dragons, spiders, trolls, and orcs face the music each time they encounter your freedom fighters. Hone your skills in magic and combat as you search for gold through the incredible maze of the city's 16 levels of dungeons and catacombs. Destroy the monsters with magic and music. Let The Bard's Tale begin!

ELECTRONIC GAMING MONTHLY \$10,000 GREAT GAME GIVE-AWAY

ENTER TO WIN ONE OF THESE GREAT GAME SYSTEMS!

Get set for the most spectacular video game contest ever! EGM is giving away more than \$10,000 worth of video games and equipment throughout 1991! We're giving away a slew of hard-hitting hardware and game softs to SIX lucky readers in not one, not two, but THREE special drawings! Great prizes like a Super Famicom, Super Nintendo, Sega Genesis System, an NEC TurboGrafx-16, an Atari Lynx and special sets of 10 hot titles for the Nintendo Entertainment System!

And the excitement doesn't stop there! EGM is giving away a super GRAND PRIZE, a full-sized arcade video game, to one of these 15 champions!

Continue PALSI

Entering the EGM \$10,000 Great Game Give-Away is the easiest part of all! Simply detach the Reader Service Card from this issue, circling the appropriate reader service number for FREE GAME INFORMATION, and send it in for automatic contest entry!

Rules: All entries must be postmarked by September 30, 1991 to be aligible for the third drawing. All proviously accepted entries are eliminated after each drawing is completed. The decision of the winners in fails. Neither EGM nor the judges will be labeled to explore the complete of the province is necessary to enter. Multiple entries are allowed, but only if sent under separate postage to: EGM Great Game Give-Away, 1920 Highland Avenue, Suite 222, Lombard, III. 60148. The specific titles of the Nintendo game packages is up to the judges. Employees and families of Sendald Publications, inc. not eligible to enter. Deadline for third drawing is September 30, 1991. Grand Prizz Winner is selected at random from the previous 15 winners on October 15, 1991. The title of the arcade game awarded is up to the judges. Void where prohibited.* \$10,000 value based on MSRP of all products awarded.

Games, games and more games! It was a great event! For the first four days in June that's all your EGM staff was doing - playing games. Not just any games, but all of the carts that will be coming out in the next six months. Hundreds and hundreds of great. average and bad softs we played them all. And, in the EGM tradition, we were there with our cameras and film. After the dust settled on the fourth day we walked away exhausted and with over 1500 pictures so you can see what is coming out in

SUPER NINTENDO

the future.

As expected, the S-NES made it's formal debut at the SCES. It, will sell for \$199 and Super Mario

The S-NES is one month away!

World is in the package. Nintendo says the S-NES should start appearing in the stores sometime in September.

But as good as the hardware is (and it is!) it's the software which will determine if the system will sell. Nintendo is doing everything it can to get as many games out this year. Unfortunately since there is a learning curve in programming for any new system, quite a few

Sega's new Mega-CD-ROM is capable of rotation, scaling and zoom!

games that we saw at the show could just as easily have been done on the older NES. But there were a lot of good games. Super Ghouls and Ghosts and Super R-Type were phenomenal! F-Zero and Pilotwings really demonstrated the abilities of the S-NES. And Final Fantasy 2 took RPG's to a new level of excellence. Familiar names are coming back in much improved form on the new system. Look for titles like: Castlevania 4. Super Adventure Island, Gradius 3. The Simpsons, Smash TV, and Sim City. Check out our 16 page buyers guide starting on page 59 for a complete description of the system and games!

Sunsoft is bringing Batman back in Return of the Joker for the NES! NINTENDO ENTERTAINMENT SYSTEM

Although Nintendo's main focus at the SCES was the S-NES, the old NES is far from dead. There were plenty of great softs on display to

keep the 30 million owners happy for quite a while. Great sequels are on their way.

Batman 2, Ninja Gaiden 3, Mega

Man 4, Wizards and Warriors 3 and Contra Force are but a few.
Original titles include Star Wars, Bio Force Ape and Over Horizon.

GENESIS

Sega really came out swinging as they had a side-by-side comparison between Sonic and Mario 4. Mario did not look very impressive in this light! Sega had other great softs. Mercs, Golden Axe 2 and Quack Shot were exceptional as was Rolling Thunder 2, Turrican and Vapor Trail. But the

rican and Vapor Trail. But the best was not even on the show floor. Sega had their long awaited CD-ROM player (Mega-CD) tucked away in a back room. It wasn't running but it was there to look at (it wasn't until the Tokyo Toy Show when we could get a hands-on-test).

TURBOGRAFX-16

NEC's major software release was the great seguel to Bonk. Also shown were portions of their new CD-ROM games - Lords of the Rising Sun. It Came from the Desert and the Addams Family. Their multiplayer sports series had Kick Boxing. Champions Forever Boxing and Davis Cup Tennis. On the hardware front. NEC had a demonstration of their new NID CD data compression technology. They are now able to pack in 100 times the info than before. Seventy two minutes of full screen, full motion video are now possible! Their new CD-ROM2, PC Engine Duo, or 2 megabit Super System Card were nowhere to be seen but in Japan, they were the hit of the Toy Show!

NEC had Bonk's Revenge for the Turbo.

THOUSANDS OF PEOPLE USE VERDICT TELEREVIEWS

THERE'S NO REASON WHY YOU SHOULDN'T BE ONE OF THEM

You	Might	Say
1		

But We Say

900 numbers are a rip-off...

Bad games are the real rip-offs. If you call our number and hate it, you're out \$1.25. If you buy a game before hearing our review, you could be out \$50 or more. It's your choice.

I don't know what I'll get...

You'll get objective, entertaining and honest reviews of all the latest games. For a sample, just call (214) 360-6000 and choose extension GAME.

The menu system would confuse me...

We'll happily send you a VTR user guide that will lead you step by step through the entire service. See below for details.

Reviews really don't interest me...

We think ours will. But even if they don't, we've got news, recommended game lists and the Sound Off, where you can make your voice heard.

Why should I listen to VTR ...?

BESIEGED

NEO-GEO

LEAGUE BOWLING

Bowling has never been so much fun!

With memory size not a factor, more attention can be paid to the little details that make the difference between a good and a great game!

GHOST PILOTS

One of the most intense vertical scrolling shooters

LEGEND OF SUCCESS JOE SNK

Yet another good arcadehome game from SNK. Put on your gloves for some of the best boxing ever.

SEN GO KU

One of SNK's best action games yet. Huge bosses and constant action will challenge you every step of the way!

OUTPOST GENESIS

GOLDEN AXE 2 Segg

As good as the first game was, the sequel is that much better. With

smoother animation, better game play and graphically intense magic spells, GA2 will be one of the hottest Genesis softs this fall!

MARVEL LAND Namco

Looks are very deceiving with this cart.

While appearing like a 'cute' game, this soft requires great technique to master the different levels.

Definitely worth trying!

QUACK SHOT

Hot on the heels of Mickey comes Donald Duck! The same attention to detail is built into this soft. Very smooth animation, great graphics and a fun' quest!

ROLLING THUNDER 2 Namco

Just barely in the arcades and Namco is already programming a home version. Easily one of the best playing games at the show and promises to be a hot cart this winter!

MERCS Sega

One of the most action intensive shooters in the Sega booth. Lots of weapons and power-ups. Extremely huge bosses to blow away, if you survive

e n d of the level!

to the

BEAST WARRIOR Renovation Vrestle War it isn't, but it is an alien-type

wrestling game. Choose your beast and take on the best in the galaxy. Some unique moves make this a good game.

MARIO LEMIEUX ICE HOCKEY **Sega**

Mario on the Genesis." Jokes aside, this is a very good, and fast moving hockey game. Great close-ups!

GROWL Taito

BLAST THE GULFER EMPIRE INTO SPACE DUST!

You are on a rescue mission. You must get rid of an evil intergalactic terrorist organization known as the Gulfer in order to save the Earth. Blast through y levels of the most heavily armed armada in the galaxy and come face to face with the Gulfer Emperor itself. The best hat is to have an extremely powerful weapon such as the Frantation or the I-Braster so that you can finish this battle on the side of victory.

The Gulfer Emperor will use the same weapon that you are using against it. Unfortunately, the more powerful you are, the more powerful it will be!
